EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Thomas Strouse on May 26, 2006.

1. The application has been amended as follows:

Claims:

In Claim 1, line 9, please insert --directly-- after "support substrate being".

In Claim 29, line 7, please insert --directly-- after "non-interrupted support substrate being".

In Claim 44, line 9, please insert --directly-- after "interrupted support substrate being".

In Claim 45, line 8, please insert --directly-- after "interrupted support substrate being".

Terminal Disclaimer

The terminal disclaimer filed on June 5, 2006 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of 10/392,075 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

2. Claims 1-9, 29-34, 44 and 45 are allowed.
3. The following is an examiner's statement of reasons for allowance: No prior art of record discloses or fairly suggest a dual-sided integral composite comprising: a first continuous non-interrupted support substrate having a front and back side, wherein the front side has a separate image layer thereon having at least one image; a second continuous non-interrupted support substrate having a front and back side with the front side having a separate image layer thereon with at least one image; the back side of the second continuous non-interrupted support substrate being directly adhered to the back side of the first continuous non-interrupted support substrate so as to form the dual sided integral composite image product; the composite image product is folded and which extends across the image layers; and including the limitations from the other independent claims.

The Applebaum reference discloses a dual-sided integral composite, however, Applebaum does not disclose wherein the back side of the second continuous non-interrupted support substrate being directly adhered to the back side of the first continuous non-interrupted support substrate so as to form a dual sided integral composite image product.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
